

Technology Board Update
November 12, 2019
Steven Gingerich

- Converted Solar Monitors to hosted solution to enable increased functionality
- Trialing Help Desk solutions internally to help increase Tech Department response time as well as tracking progress of various projects.
- Began training new Elementary/Middle School IT Staff member, Nicholas Simmons.
- Implemented and configured Content Compliance for email system. This increases the security and safety of Students and Faculty via an additional layer of identity verification.
- Began initial steps for migration from Open Directory to Active Directory as a user login solution.
 - Open Directory is no longer supported and is expected to be fully discontinued by Apple in the future.
 - Utilization of Active Directory will allow increased flexibility and functionality for user authentication as well as better integration with other platforms, programs, and services already employed by TCSC.
- Legacy Wireless network decommissioned at the Middle School.
