

Kitchen Update January 6th 2020

Kitchen Staffing

- We have retained a student worker into full-time status this month with a mid-year graduation and are excited to have him in our ranks.
- We have 2 employees coming through the WillSub hiring process and hope for a few more as soon as possible.

Equipment

- We are looking for quotes on a new steamer oven and repair/replacement for the steam unit base that runs the kettles in MS
- We hope to have the first of the HS freezer's repaired/replaced during the next break (it takes some down time)

Payroll

- We look forward to the final step in seeing the starting wage increase for Will-Sub employee hires and hope it will give us an increase in staffing

Food Sales

- We have seen a small increase in meals-sold-per-service-day over the last 4-6 weeks and are hoping to continue that trend as we finish the year off

Promotions/Programs

- We have some staff in the MS that are interested in trying the Breakfast-In-The-Classroom program to increase the amount of students receiving nutritious meals in an effort to increase receptivity and student wellbeing. We hope this will mirror the many other schools growth and success utilizing this program.
