

Kitchen Update May 4th 2020

Kitchen Staffing

- We continue to have 9 kitchen staff show up each day and ensure our meal service goes smoothly, and are very thankful for all that they have done as well as our volunteers and bus driving staff.

Equipment

- All repairs have been completed, and the only remaining item of need (at this time) is the install of the new steamer in the TMS kitchen. This process has come to a halt though due to COVID-19 and all that it entailed.

Meal Service Update

- We have adapted the meal service program multiple times throughout this pandemic, and our staff have done exceptionally well. We are serving both breakfast and lunch meals to hundreds of students each service and will begin our final adjustment of 5-day service returning on Monday the 11th (due to the Boys and Girls Club stopping their community-serving assist from the prior weeks). We are averaging about 353 students being served daily for a total of 706 meal sacks per day, and served 8,384 sack meals in April (this is with the school only serving Monday, Wednesday, and Friday as the B&G Club served Tues and Thurs). In the coming final weeks, we estimate that we will be sending out 3,530 sack meals per week to our students in need.
