

Kitchen Update June 26th 2020

Equipment

- We are waiting on the results from the building commissioner regarding our MS kitchen freezer (we will need it operational before school begins).
- We believe we will get the superintendent's decision regarding our MS kitchen steamer repair/replacement when the results of the building commissioner's report are in-hand.

Staffing

- We have most of the staff prepared to return but are concerned that 2 or 3 staff may have issues if masks are required, and hope to get a few additional substitutes hired before then (however the process is still very slow and we still have received 0 employees working from WillSub's hiring practices).
- It is likely (based on the most popular options for service in the upcoming school year) that we will be short-handed due to the restrictions on self-service and the potential need for disposable foam trays and additional items being handed out.

Service

- We are looking forward to meeting with Dr. Glaze and other assorted department heads to see what options we have for meal service in the upcoming school start. At this time, we do not have any concrete plans but are ready to begin preparing and planning for what is to come.
