

Technology Board Update
September 8, 2020
Steven Gingerich

- Successfully completed student device distribution for all grades K-12.
- Initial launch of Clever; a free K-12 tool that utilizes automated rostering and Single Sign-On for numerous TCSC-utilized platforms to assist in simplifying the management of multiple logins, etc, for students and teachers.
 - Additionally, this increases efficiency within the IT department for creating and managing accounts, etc.
- Apple Classroom successfully configured and available K-12.
 - Replacing LanSchool for TCSC, Apple Classroom increases teacher-student engagement as well as offering student device monitoring accessible to teachers.
 - Apple Classroom is a tool made available to K-12 institutions free of cost, saving TCSC \$2000+ annually versus LanSchool.
- New teacher laptop distribution widely completed. Teachers receiving new laptops were given until September 30th to migrate data, etc.
 - Further communication will be issued regarding this process in order for IT to coordinate with Teachers to assist in meeting this deadline.
