

Technology Board Update
November 10, 2020
Steven Gingerich

- Received test devices and equipment to evaluate as potential candidates for 2021-2022 1:1 distribution.
- Quote approved to upgrade point-to-point equipment at High School. Project scheduled for November 5th.
 - Upgrading connection between Network closet in High School Science room and External Point-to-Point to increase reliability of connection to Athletics and Transportation facilities.
 - Once completed, the project will also provide network access to the Football Field Press box as well as external Wi-Fi access for the Ticketing area to help accommodate E-Ticketing needs in the future.
- Began configuration and distribution of Hotspots to provide internet access and better accommodate E-Learning needs for students.
