

Technology Board Update
January 12, 2021
Steven Gingerich

- Conducting Network assessment for potential Category 2 Wi-Fi Access Point expansion via E-Rate renewal.
 - Current scope of work would dramatically increase Wi-Fi Access Point density at Elementary School while also replacing older Access Points in Middle and High Schools as well. This will improve overall performance of Wi-Fi network while simultaneously helping to maintain future compatibility with client devices.
- Continued hotspot distribution has reached close to 50% of available units.
- Successfully supported ILearn Systems Readiness tests.
- Continued assistance in content migration for TCSC Website redesign.
