Performing Arts Program
Agriculture Program**

Tipton Elementary School (TES) is home to grades PK-5. With teacher to student ratios far below state average, students are immersed in small learning communities where individual needs are met. We focus on teaching the whole child with rich arts education taught by certified teachers, a comprehensive social and emotional learning curriculum, and STEM education using PLTW Launch. TES students are engaged in 21st century learning using 1:1 technology without forgetting the importance of teacher/student relationships. Ask about our comprehensive preschool with before and after school care. Tipton Elementary offers small school environment with big school opportunities.

Tipton Middle School (TMS) houses students in grades 6-8. At TMS, we promote the middle school philosophy by exposing students to a multitude of learning experiences that include STEM, robotics, band, choir, art, agriculture, and world languages. While focusing on the importance of core content classes like English/language arts, literature, math, science, and social studies. At TMS, we also have the opportunity to prepare for high school by taking algebra, foreign language (fall 2022), preparing for college and careers, and intro to agriculture in 8th grade. Beyond the academic focus, TMS offers a full range of athletic teams and after-school clubs that will fit the interests of students and keep them active in school.

Tipton High School (THS) is the home of grades 9-12 and the crown jewel of “Blue Devil Nation.” THS has a 98% graduation rate and a 2020 College Success Award winner from greatschools.org. Tipton High School’s block 8 schedule (fall 2021) allows for extended learning time for all classes, while providing enough class periods for students to focus on academic coursework and still take electives. In addition to the traditional courses in science, math, English, and social studies, Tipton High School offers multiple classes in the areas of agriculture, eSports, technology, business, performing arts, 3 world languages, family and consumer science, health and physical education (including aquatics), career technical education, and industrial technology.

In addition, THS offers a robust number of college readiness courses with 6 Advanced Placement (AP) courses, 7 Advanced College Placement (ACP) for Indiana University dual credit (generating nearly 30 hours of college credit), and 5 Dual Credit Classes through Ivy Tech State Community College. THS also offers many career readiness courses on our campus that includes welding, automotive, building trades, advanced manufacturing, metals, and computer science. Students are also eligible to attend Hinds Area Career Center and Kokomo Career Center for other advanced career readiness courses.

Tipton High School offers 48 total extra-curricular activities and clubs, that include marching band, show choir, theater, Future Farmers of America, National Honor Societies, and academic clubs. Many of the activities are recognized at the state and national level. THS has 21 IHSAA sanctioned sports with nearly 93 sectional, regional, semi-state, and state championships.
