

Technology Board Update
January 11, 2022
Steven Gingerich

- E-Rate Category 2 project completed during Christmas Break.
 - Including complete overhaul of the TES WiFi, greatly improving wireless coverage and load balancing.
 - 48 Access Points installed, 14 of which are new installations.
 - Newer equipment from TES relocated to increase coverage, as well as replace old equipment, at TMS and THS.
 - Optimizations will continue to be made as needed to allow better utilization of relocated equipment.
- Began BrightArrow implementation. BrightArrow is a tool that integrates with PowerSchool, allowing teachers and staff to communicate directly with Students and Parents via email, mass SMS, etc.
 - Will also aid in the digital delivery of Report Cards, Test Scores, etc.
- Quotes submitted and approved for TES Projectors. Current projectors are significantly aged and largely rely on outdated interfaces/technologies.
- Software/settings distributed in preparation for CoGat and WIDA testing.
