

Technology Board Update

February 8, 2022

Steven Gingerich

- Developed device rotation incorporating the iPad 1:1 program at TES as well as completion of iPad rollout at the TMS. Once in place, iPad variations/models at the TES will be reduced, allowing for more effective support from both a hardware and software perspective.
 - Quotes for 2022-23 Student devices received from Apple and submitted for approval. Including iPad devices for TMS Teachers working with iPad-assigned students beginning next school year.
 - Receiving quotes for additional equipment needed for 2022-232 Freshman Macbook Airs including bags and hardshell cases.
- BrightArrow installation complete, scheduling training for staff.
- Coordinating with Officer Maddox and Roeing Corp. to conduct installation of additional security hardware in all buildings K-12 as well as updated hardware for the Transportation facility.
- Completed installation of network equipment at THS, upgrading from older 10/100 Mbps hardware to Gigabit (1000 Mbps). This should allow for better bandwidth utilization to the affected areas of the building.
