

Technology Board Update
March 8, 2022
Steven Gingerich

- Devices for 2022-23 ordered successfully.
 - Began the process of purchasing needed materials as we have done in past years.
 - Tested samples and submitted the quote for MaxCase shells for the new 9th grade laptops. The shells provide additional structural rigidity and durability for the devices.
 - Asset tags ordered for 2022, this allows better inventory tracking through Filewave, etc.
 - Receiving quote for 9th Grade laptop bags.
- Conducting laptop OS updates at THS for compatibility with ILearn testing software.
- Vape sensors installed and activated successfully.
 - Continuing to work with Roeing Corp. on plans for further Security Camera upgrades. Our intent is to help fill-in some of the blind spots both inside and outside of the facilities in order to optimize the overall security of the TCSC premises.
- Developing a potential plan to conduct annual, bi-annual, etc. phishing campaigns to help better support and educate TCSC staff on the importance of cybersecurity.
 - Phishing Campaign software already provided by the State of Indiana for use in K12 public schools.
