

Technology Board Update

June 14, 2022

Steven Gingerich

- Completed successful pull-in of the vast majority of student devices.
 - TMS and TES summer school will be turned-in on June 10th.
 - THS summer school will be turned-in on June 17th.
 - Devices for Graduates that opted to purchase theirs will be prepped and families contacted for pickup as soon as possible.
 - Approximately 20% of our seniors opted-in to purchase this year.
- Device prep for 2022-23 school year to begin on Monday, June 20th, following the end of Summer School.
- Annual Filewave (Device Management system) renewal submitted and approved. New licenses installed successfully and properly provisioned for the duration of the next calendar year.
 - Completed renewal of APN and DEP Certificates through Apple. This shifts our date for renewal so that it falls during the summer; aligning better with our typical work and project patterns to help ensure minimal-to-no disruption to the end-user.
- Coordinating with SecuredTech Solutions, as we have done in previous years, regarding pickup for deprovisioned, outdated, and broken/unrepairable equipment.
