

Technology Board Update

June 10, 2025

Steven Gingerich

- Ordered 11 replacement PCs for office staff across all three school buildings and the corporation office. These systems will be configured and deployed upon arrival.
- ParentSquare licensing orders have been processed, and onboarding is currently underway. Installation has been completed to enable synchronization with PowerSchool.
- Device collection has been successfully completed in all three school buildings. Inventory review is in progress, including damage assessments and billing for any missing equipment.
- Devices are being prepared for the upcoming school year. This includes wiping and recycling decommissioned units, setting up Chromebook deployment for grades 3–8, and wiping devices used by grades 9–12.
- Two failed exhaust fans were identified in the APC server cabinet housing the main infrastructure. Quotes for replacements have been submitted for approval. Upon receipt, in-house IT staff will perform the installation.
- Held meetings with Roeing network consultants to address the district's aging server infrastructure. Currently working on gathering quotes and developing a migration roadmap to modern hardware and software platforms.
