

Technology Board Update
September 9, 2025
Steven Gingerich

- Coordinated with Ricoh regarding the replacement of faulty machines that were recently delivered.
 - Implemented troubleshooting workarounds for teachers to ensure continuity of use until replacements arrive. Long-term resolution will be achieved once replacements are installed.
 - Replacement equipment has been ordered at no additional cost to TCSC and is currently awaiting dispatch.
- Partnered with Roeing to complete emergency repairs to portions of the THS network equipment, which was inadvertently damaged during construction.
 - Obtained quotes for replacement equipment and submitted them for review.
- Performed routine maintenance updates on a subset of backup servers, enhancing overall system security and reliability.
- Collaborated with ENA/Zayo to complete firewall maintenance and updates, including an audit of firewall rules.
- Completed implementation and onboarding of Securly Classroom for TMS and TES. Pilot testing with select teachers is underway ahead of a full rollout later this month.
 - Securly Classroom provides a functional replacement for Apple Classroom at Chromebook-assigned grade levels.
 - The platform enables teachers to directly monitor student device activity in the classroom while supporting collaborative learning tools.
