

Technology Board Update

June 9, 2026

Steven Gingerich

- Successfully completed End of Year turn-in of student devices.
 - Devices will be evaluated and damages repaired over the course of the summer.
 - This will also include wiping devices to a factory state; ensuring a clean slate for the start of the 26-27 school year.
- Worked with ENA/Zayo to complete an audit of Firewall rules and infrastructure.
 - Older/unused configurations decommissioned, helping to increase overall network security.
- Worked with Dell regarding warranty status and repairs of Dell 3120 Chromebooks for 26-27 school year.
- Roeing scheduled to perform network infrastructure maintenance June 10-11.
 - This involves reconfiguring VLANs across switches located at the High School in order to make better use of physical capacity.
