

MEMORANDUM

To: TCSC Board of School Trustees

From: Scott Jaworski, Superintendent

Date: August 11, 2026

Re: Recommendation to Declare Welding Equipment Surplus

The administration recommends that the Board declare the following welding equipment from the Technology Education program as surplus property:

Code Number	Welder Type	Brand/Model	Condition
FM-1	MIG	Firepower	Poor condition
LM-3	MIG	Lincoln Electric Marquette	Requires replacement nozzle, power cord repair, and replacement ground clamp
MM-2	MIG	Millermatic 250	Requires regulator gauges, replacement ground clamp, spool holder repair, replacement nozzle and tip assembly, and cord-end repair
LM-2	MIG	Lincoln SP-175 Plus	Requires replacement nozzle assembly and cord repair

The equipment is outdated, in poor condition, or requires repairs that are not considered cost-effective. The equipment is no longer needed for instructional purposes.

The administration recommends that the Board declare the listed equipment surplus and authorize its disposal in accordance with applicable Board policy and legal requirements. When practical, the equipment will be sold, recycled, or disposed of as scrap.

Recommended Action:

Approve the declaration of the identified welding equipment as surplus property and authorize the administration to dispose of the equipment appropriately.
